DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the DVD player connected to said body and fastened to said body with a fastener must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

Art Unit: 2851

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 1 is objected to because of the following informalities: There is no antecedent bases for the memory card recited in claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 contains the trademark/trade name Bluetooth. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe wireless transmission module and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Denmeade (U.S. Pub No. 2004/0017548). Denmeade teaches an integrated projector 7 comprising a body 19 with a projector circuit internally (inherent) 15 and a projection lens 1/7 external (figure 5). A card reader (flash card reader, paragraph [0021, 0022]) is installed internally to read data on a memory card. A wireless remote 18 controls the internal components of the system.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Denmeade (U.S. Pub No. 2004/0017548) in view of Yamauchi (U.S. Patent No. 6,388,881). Denmeade teaches the salient features of the claimed invention except it does not explicitly state that the DVD player is both connected and fastened. Yamauchi teaches that it was known to provide an

Art Unit: 2851

integrated DVD by both connecting it with a connector 63 and fastening it (with screws) to what it is integrated with. The applicant is directed to review col. 7, lines 16-24 for example.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Denmeade (U.S. Pub No. 2004/0017548) in view of Dolgoff (U.S. Patent No. 5,300,942). Denmeade teaches the salient features of the claimed invention except it for external wireless speakers. Dolgoff teaches that it was known to provide external wireless speakers to a projection system. The applicant is directed to review claim 139 for example.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Denmeade (U.S. Pub No. 2004/0017548) in view of Dolgoff (U.S. Patent No. 5,300,942) and further in view of Olsen (U.S. Pub No. 20040041989). Denmeade in view of Dolgoff teaches the salient features of the claimed invention except it for Bluetooth transmission. Olsen teaches that it was known to provide internal Bluetooth transmission 124 to a projection system. The applicant is directed to review figures 1 and 3. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Olsen for the purpose of utilizing commercially available technology.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
